Chapter 87. Buildings, Numbering of

§ 87-2. Location and size of numbers; time frame for compliance.

House numbers shall be affixed to the structure in a prominent location, facing the principal street, immediately adjacent to the front door or, if no door is present, adjacent to the corner of the house closest to the driveway.

- A. House numbers shall be four inches or larger in height with a minimum stroke width of 0.5 inch and shall otherwise be as required by applicable Codes of New York State.
[Amended 4-23-2003 by L.L. No. 2-2003]
- B. If the structure is not visible from a public or private road, the numbers shall be permanently affixed to a post or a panel immediately adjacent to the entrance driveway of said structure.
- C. New structures shall have numbers permanently affixed upon completion of siding, or prior to issuance of a certificate of occupancy.
- D. Existing structures shall have one year to come into compliance, after the adoption of this chapter.
